HUNDREDS OF EMOTIONS

The first truly global mobility brand, Vespa has become a link between generations, interacting with very distant social environments, creating different cultural phenomena, peculiar to the realities in which it has become a protagonist and a distinctive characteristic. It has driven lifestyle, musical and youth revolutions. It has generated intense moments of aggregation such as the Vespa World Days. And today it is one of the most widespread and well-known Italian products anywhere in the world.

VESPA GTS 125 / 300 hpe

Passionate travellers need stability in order to reach their destinations.

Vespa GTS combines the urban spirit of a large body vehicle, comfortable, protective and technological, with a passion for touring. The Vespa flagship introduces a front section restyling, with an updated shield and horn cover. The front and rear lights adopt full LED technology, for better visibility in all riding conditions. The model stands out for its new 300 hpe engine (High Performance Engine), the most powerful ever mounted on a Vespa, the latest evolution of the 300 cc single cylinder, 4 stroke liquid-cooled engine with electronic injection that offers heightened performance and reduced fuel consumption*. The standard equipment is rounded out with ASR electronic traction control. Vespa GTS is also available as a 125 cc version with cutting-edge i-get Euro 4 engine combined with Start & Stop system and ABS as standard. Accessible and a pleasure to ride thanks to its ergonomic saddle with anti-slip fabric, Vespa GTS also features a remote control to open the saddle, a Bike Finder device to locate the vehicle when parked, and a USB port in the drawer on the back of the shield.

*with respect to the 2016 Vespa GTS model

GTS TOURING 125 / 300 hpe

A special Vespa trim that pays tribute to the tradition of travel, its instinct for freedom, exploration and encounter. The Touring equipment is in harmony with the design of the vehicle, the evocative windshield improving protection levels while retaining elegance thanks to its small size, and the rear luggage rack and spacious storage compartment increasing load capacity to help ensure a memorable holiday, whether travelling alone or as a couple. Available with a Rosso Vignola or new Verde Bosco colour scheme, Vespa GTS Touring also stands out for its saddle with new and elegant upholstery and dedicated plate on the leg shield. Featuring the best technological safety equipment, new full LED lighting and Euro 4 engines, Vespa GTS Touring runs with sprint and reduced consumption both urban and out-of-town routes.

VESPA GTS SUPER 125 / 300 hpe

The successor to sports models with a large steel body, Vespa GTS Super gives Vespa style a sports twist. Gutsy and refined, the front section is updated with a redesigned shield, the centre of which incorporates the unmistakable horn cover, extended and enhanced with three chromium plated decorative chevrons. The vehicle also features black rims with a diamond finish and a double upholstered saddle with edging or Sport single-seater saddle (accessory). The new front and rear lighting with full LED technology creates a high-impact look as well as increasing safety. Also new is the 300 hpe engine, the most high performing of the entire Vespa range, is combined with a front and rear disk braking system with ABS and ASR for absolute riding safety for the ultimate riding experience.

VESPA GTS SUPERSPORT 125 / 300 hpe

That Vespa sports essence is strong and charismatic, with bold style choices that are hard to miss. Wheels are full black and the two matte colours, Grigio Titanio and brand-new Blu Vivace, are enhanced with dedicated new graphics. Attention to detail is also clear in the saddle, which features double upholstery and edging, and in the graphics of the combination analogue/digital instrumentation.

VESPA GTS SUPERTECH 125 / 300 hpe

A new entry in the range, Vespa GTS SuperTech is born to showcase that sports nature and passion for technology. Identifiable thanks to its dedicated Nero Vulcano and Grigio Materia colour schemes enhanced with exclusive graphics and saddle upholsteries, Vespa GTS SuperTech offers an even more enjoyable and unique riding experience. It is the first large body Vespa to adopt totally digital instruments thanks to its 4.3" full colour TFT display. As well as providing riding parameters and general journey stats, the display also serves as an interface for the VESPA MIA connectivity system, which allows for complete communication between rider and vehicle. The Bluetooth connection and dedicated Vespa app - available for download in the App Store or Google Play - transform the display into an extension of the smartphone and allow the rider to answer calls, view message notifications*, activate voice commands and select music playlists. The display also serves as a navigation system, accompanying the rider, through pictogram indications, along the route pre-set on the Vespa App.

*The navigation function is free of charge for three years starting from the first usage. The optional renewal can be managed through in-app purchase by the customer at his own expense.

VESPA SEI GIORNI II EDITION 300 hpe

The exclusive Vespa Sei Giorni, a special version produced as a limited edition, is the heir to the original Vespa Sport “Sei Giorni”, a model that became legendary and was created specifically for the “Sei Giorni Internazionale di Varese” regularity competition of 1951. Following on from the great success of the first edition is Vespa Sei Giorni II Edition, even more sporty thanks to its new 300 hpe engine. The Vespa Sei Giorni style recalls that of classic Vespas. Characteristic elements include the “low headlight”, the handlebar in exposed metal tubing, and the bronze top fairing that elegantly wraps the circular instrument cluster, while the redesigned leg shield features the new “tie”, extended and enhanced with matt black embellishments. The overall look incorporates a black number plate, taken directly from the livery of the Vespa used by the legendary Squadra Corse in the ‘50s, and is enhanced by black details such as the wheel rims and silencer, and gritty red details. Vespa Sei Giorni boasts a spacious storage compartment and a large and comfortable seat thanks to the race-style saddle with two-layer upholstery, homologated for two persons. It features a USB port as standard, located inside the leg shield compartment, while the rear light set now adopts full LED lighting technology, a solution that contributes to improving active safety. On the safety front, the ABS anti-lock braking system is standard equipment. Vespa Sei Giorni II Edition also stands out for its new dedicated colour, Sei Giorni Grey.

VESPA PRIMAVERA 50 / 125 / 150

Fifty years after its launch, Vespa Primavera still boasts that youthful appearance, in sync with the spirit of freedom, dynamism and attention to environmental issues. Uninterrupted success and now a restyling that makes it even more agile and ultra-technological. The 12" wheel rims with five-spoke design ensure total stability and safety on all road surfaces. The i-get 4-stroke single-cylinder engine allows for smooth, noiseless riding and reduces consumption while offering top of the range performance. Front and back LED lighting, Bike Finder, and remote saddle opening as standard (with the 125 and 150) round out its equipment.

VESPA PRIMAVERA TOURING 50 / 125 / 150

Dedicated to those who love to travel and appreciate technological innovation as a way of enriching the riding experience. Vespa Primavera Touring is in keeping with the Vespa tradition for travel, incorporating all the improvements of the Primavera range. The i-get 4-stroke single-cylinder engine ensures top of the range performance and reduced consumption. The large 12" wheels guarantee stability and riding comfort on any surface, while front and rear chrome luggage racks add a retro touch to the vehicle's load capacity. The ergonomic saddle and elegant top fairing are both practical and stylish.

VESPA PRIMAVERA S 50 / 125 / 150

Zippy and sporty, the brand-new Vespa Primavera S is as dynamic as it is gutsy. It adopts the Primavera range of engines but with a marked technological twist. For the first time in Vespa history, with the 125 and 150 engines, it comes complete with a fully digital and colour dashboard with 4.3" full colour TFT display that also serves as the screen for the VESPA MIA connectivity system. The Bluetooth connection and dedicated Vespa app - available for download in the App Store or Google Play - transform the display into an extension of the smartphone and allow the rider to answer calls, view message notifications, activate voice commands and select music playlists.

VESPA SPRINT 50 / 125

Heir to Vespas of the Sixties, small, nippy and cutting-edge, it boasts the same spark of energy and youthful appeal. Its technical and technological reliability make for a pleasurable, carefree ride. Vespa Sprint is easy to handle and stable thanks to its small, protective body and large 12" wheels with alloy rims, while its bold style is enhanced with a distinctive rectangular headlight. The i-get 4-stroke, 3-valve single-cylinder engine, the perfect balance between performance and consumption, ensures an agile ride. The lights adopt LED technology, while Bike Finder and remote saddle opening are fitted as standard on the 125 cc model.

VESPA SPRINT S 50 / 125 / 150

The gutsiest small body in the range elevates that Vespa sports spirit to the max. The latest-generation engine is the secret to nippy riding in traffic and comfort on long-range trips, all with contained consumption.

The model also features an exclusive saddle in line with its sporty nature, as well as dedicated colours and graphics. In step with digital evolution, Vespa Sprint S offers a futuristic riding experience with the 4.3" full colour multifunctional TFT display (only on 125 and 150 cc) that transmits vehicle status information to a smartphone. It is possible to access VESPA MIA via the same display, a system that makes communication between vehicle and rider more interactive and complete. Thanks to a Bluetooth connection and the Vespa app, which can be downloaded from the App Store or Google Play, the display becomes an extension of the smartphone, allowing the rider to answer calls, view message notifications, and activate voice commands and music playlists.
